Sanket Vijay Jadhav

Full Stack Developer (MERN) | Mumbai, India | linkedin.com/in/sanket-jadhav-a1b550329 | github.com/Sanket184511

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying MERN applications, REST APIs, payment gateway integrations and AI-powered features. Strong interest in backend engineering, system design and DevOps. Trained at Sheryians Coding School (KODR Bootcamp); hackathon podium finisher and co-author of a published research paper. Also grew a technical education Instagram channel (@dev_aur_code) to 4,000+ followers in under a month by explaining CS and backend concepts consistently.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, Vite, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware, MVC architecture, Cookie-based Authorization
Databases: MongoDB, Mongoose, MongoDB Atlas, Redis
APIs & Integrations: Razorpay Payment Gateway, Google Gemini API, Webhooks
Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel, Render, Claude Code
Core Concepts: DSA, OOP, Asynchronous JavaScript, System Design Basics, CORS, ACID, OSI Model, Client-Server Architecture

PROJECTS

Obu - Recruitment and Job Matching Platform | React, Node.js, Express.js, MongoDB, REST APIs
- Built a Tinder-style platform where recruiters and job seekers match by swiping.
- Designed the recruiter and candidate workflows and the candidate/job discovery experience.

Nagrik Copilot - AI for Digital Public Infrastructure & Governance | React, Vite, Node.js, Express.js, MongoDB Atlas, Gemini API, Vercel, Render
- Built a full-stack app with a Document Simplifier that turns complex government documents into plain language, and a Document Readiness Checker, both supporting English and Hindi.
- Developed a Node/Express backend integrating the Gemini API for AI processing, with MongoDB Atlas for data storage.
- Deployed the React (Vite) frontend on Vercel and the backend on Render with separate client/server codebases.

Razorpay Payment Gateway Integration | Node.js, Express.js, Razorpay API, JavaScript, HTML
- Implemented the end-to-end payment flow: order creation, checkout, payment signature verification and webhook handling.
- Structured payment logic in a dedicated controller and connected it to a frontend that triggers payment with a single click.
- Tested successful transactions end to end in Razorpay test mode.

QoS Collab - API Testing Platform (College Mega Project) | React, JavaScript, REST API integration
- Built the React front end for API testing and quality-of-service monitoring and integrated it with the backend alongside backend developers.
- The project resulted in a published research paper (IJACTE).

EXPERIENCE & TRAINING

Full Stack Web Development Trainee | KODR Bootcamp, Sheryians Coding School, Bhopal
- Completed intensive hands-on training in the MERN stack, backend development and deployment.
- 2nd Runner-up in the Sheryians 12-hour hackathon (multi-tenant app) and 1st place in the Rs. 1,000 Challenge.

Content Creator (Technical Education) | @dev_aur_code on Instagram
- Grew the channel to 4,000+ followers in under one month with daily posts explaining OSI model, CORS, ACID, payment gateways and more.

EDUCATION

B.Tech, Computer Science & Engineering | Bharati Vidyapeeth College of Engineering, Kolhapur | 2022 - 2026 | CGPA: 7.7

ACHIEVEMENTS

- 2nd Runner-up, Sheryians Coding School 12-hour hackathon; 1st Place, Rs. 1,000 Challenge
- Co-author, IJACTE research paper from the college mega project (QoS Collab)
- Entrepreneurship Bootcamp, E-Cell IIT Bombay (Oct 2025)
